

## DELEGATE REGISTRATION

**Objective:** In this module, delegates can be added for a particular organization.

For single delegate registration, there will be a single coordinator. Here both the coordinator & delegate information must be same. Now if more delegates are required, he can login as the coordinator and add delegates from there.

- Go to event listing page and click on “Online Delegate Registration” link at right sidebar.

- It will take you to the Delegate Registration page which looks like the form displayed below.
- Fill up the required fields and click on “Register” button. A mail will be send to the administrator for approval.
- The admin would check the user details and approve the user from back-end. On approval it will send an email to the user with the login details.
- This login details will be used to login for Delegate.
